Steps to disable a device: • Press Windows and R keys together This will open the Run box.. If the issue still persists, I would suggest you to try disabling the display adapter temporarily from the device manager and check if this helps to fix the problem.. Refer: How to perform a clean boot in Windows Note: After troubleshooting, refer to this section 'How to reset the computer to start normally after clean boot troubleshooting' Method 2: Disable display adapter.

I would suggest you to try following the steps given below and check if this helps to fix the issue.. I appreciate all the efforts that you have put in while trying to resolve this problem.. When you hover over it with your mouse it highlights like normally Also, when you open many programs, or folders, they do not show in the start bar.. We, at Microsoft strive towards excellence Many thanks for the response None of those had an impact on the problem.. So I have this client with this laptop and his start menu / orb doesn't work! The orb is there but if you click it, nothing happens.. Step 2: Perform Clean Boot Putting your system in Clean Boot state helps in identifying if any third party applications or startup items are causing the issue.. Follow these steps to start the computer in safe mode Click the link and follow the steps " Start your computer in safe mode" If the problem does not exist in safe mode, try to perform a clean boot and check. 0041d406d9 [Ice Book Reader For Mac Os](#)
